

How can the global drone technology provide solutions for all?

An Air Navigation Services Perspective

› F. Schubert

- › High Level Conference on Drones “*Drones as a leverage for jobs and new business opportunities*”
 - › Warsaw / 23 November 2016

Key messages

- › Mutual benefits
 - Manned and unmanned aviation have a lot to learn from each other
 - Managing different cultures and business models is key for the successful sharing of the airspace
- › Safety
 - The safety management framework in place for manned aviation is a strong asset for the safe integration of drones
- › Disruptive technology
 - The drone industry offers a framework to develop and validate innovative solutions, which once brought to maturity, can be safely exported in the world of manned aviation
- › Regulation
 - Conceptual elements now need to be translated into workable regulation
 - Technology can act as a substitute for hard regulation
 - *"If Technology is Right then Regulation is Light"*
